Conversion		36%

PRIMARY KEYWORD

fusion game

Based on our analysis of your listing, the primary keyword best suited for this app is fusion game, and every keyword check is scored against it. Your keyword 'star' is too broad for this specific game, as it could refer to many different types of games. Other strong options: nuclear fusion game, space puzzle game, star fusion game.

FIX THESE FIRST

6 changes, ranked by impact

Ordered by how much each check can lift your score. Each fix is written for this exact listing.

#1 · 5 pt

SEARCH & KEYWORDS

Primary keyword appears in the title

"fusion game" doesn't appear in the title. This is the single highest-leverage edit available.

RECOMMENDED FIX

Update the title to "Bottled Star: Fusion Game" to include the primary keyword. This will significantly improve search visibility for "fusion game" while keeping the brand name first and respecting the 30-character limit.

#2 · 4 pt

SEARCH & KEYWORDS

Primary keyword appears in the short description

"fusion game" is missing from the short description.

RECOMMENDED FIX

Revise the short description to include the primary keyword. Consider changing it to: "Bottled Star: A unique fusion game. Fuse nuclei, climb to iron, choose your star's end." This integrates the keyword naturally within the 80-character limit.

#3 · 4 pt

SEARCH & KEYWORDS

Primary keyword coverage in the description

"fusion game" never appears in the description, Play indexes this field, so that's a real ranking gap.

RECOMMENDED FIX

Integrate "fusion game" naturally into the full description, especially in the opening sentences. For example, you could start with: "Bottled Star is a unique fusion game where you inject nuclei into a sealed chamber." This will help Google Play index the app for the primary keyword.

#4 · 2 pt

CONVERSION

Description length is substantial

Description is 1,109 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

RECOMMENDED FIX

Expand the full description to at least 3,000 characters by adding more details about gameplay, strategies, unique features, and potential future updates. This provides more keyword surface area for Google Play's indexing and offers more information to potential players.

#5 · 2 pt

CONVERSION

Description is scannable

The description reads as a wall of text. Chunk it into labelled sections with bullets.

RECOMMENDED FIX

Break up the full description into more scannable sections using clear headings and bullet points. For instance, use headings like "Gameplay Mechanics," "Game Modes," and "Stellar Evolution" to improve readability and user engagement.

#6 · 2 pt

CONVERSION

Copy leads with benefits, not features

Only 0 benefit phrases detected. Users convert on outcomes ("save time", "stay organized"), not feature lists.

RECOMMENDED FIX

Rephrase parts of the description to highlight benefits and user outcomes. Instead of just describing actions, explain what the player gains, such as "Experience the thrill of stellar creation" or "Master the art of cosmic collapse."

FULL BREAKDOWN

Every check, scored

All 15 checks the engine ran, grouped by category.

Search & Keywords

8.5 / 24 · 35%

Title uses the 30-character budget — 2.5 / 5

Title is only 12 of 30 chars. That leaves 18 characters of the strongest indexed field unused, room for a keyword descriptor.

Primary keyword appears in the title — 0 / 5

"fusion game" doesn't appear in the title. This is the single highest-leverage edit available.

Title reads clean, not a keyword list — 2 / 2

Title reads as a brand plus a short descriptor, not a comma-separated keyword list.

Short description uses the 80-character budget — 4 / 4

Short description is 74 of 80 chars, the budget is well used.

Primary keyword appears in the short description — 0 / 4

"fusion game" is missing from the short description.

Primary keyword coverage in the description — 0 / 4

"fusion game" never appears in the description, Play indexes this field, so that's a real ranking gap.

Policy Compliance

12 / 12 · 100%

✓ **Title follows Play's format policy** 3 / 3

Title is free of emoji, ALL CAPS, and repeated special characters.

✓ **No banned promo language in title or short description** 4 / 4

No banned promotional or ranking language in the title or short description.

✓ **Description avoids promotional claims** 2 / 2

Description avoids ranking and price-promotion claims.

✓ **Keyword density stays in the healthy range** 3 / 3

"iron" appears 4× (2.6% density), inside the healthy 2–5% range.

Conversion

4 / 11 · 36%

✓ **Short description sells, not welcomes** 1 / 2

Short description is substantive; an action-verb opener would be stronger.

! **Description length is substantial** 1 / 3

Description is 1,109 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

! **Description is scannable** 1 / 3

The description reads as a wall of text. Chunk it into labelled sections with bullets.

! **Copy leads with benefits, not features** 0 / 2

Only 0 benefit phrases detected. Users convert on outcomes ("save time", "stay organized"), not feature lists.

✓ **Tone stays credible** 1 / 1

Emoji and exclamation marks are restrained, the copy reads professional.

STRATEGIC ADVISORIES

Beyond the copy

Off-listing levers the score cannot measure directly, but that compound over time.

RANKING

Drive review velocity, not just count

Fresh reviews count for more than old ones. Trigger an in-app rating prompt after a positive moment (e.g. completing a task), not on launch.

CONVERSION

Track conversion rate from search

In your Google Play Console dashboard, click the Grow users tab in the left sidebar, then open Store presence and click your default store listing to see your store listing conversion rate (visitor to install). Aim for 25% or higher. If you are below that, the icon, screenshots, or title are losing visitors.

CONVERSION

A/B test screenshots and copy with store-native tools

Play Console's store listing experiments run real-traffic A/B tests at no cost. Test the first three screenshots and the short description first.

EXPANSION

Localize the listing for your top 3 markets

Each locale is a separate listing on Play. An English-only listing under-ranks against localized competitors.

MAINTENANCE

Ship a small update every 6 to 8 weeks

Both stores favour actively maintained apps, and users check the last-updated date. A version bump with a refreshed What's New note is enough.

OPTIMIZED DESCRIPTION

We also optimize your description for you

This report is your ASO score. Log in to the Testers Community website, open your app, and go to the Reports tab to generate an optimized store description, ready to paste into Play Console.
